ZHANG, KUNYUAN

Design of swirl simulators

p 305 A87-27477

ZHANG, QIWEI

Two-dimensional subsonic and transonic wind tunnel wall interference corrections for varied walls

p 686 A87-46955

ZHANG, SANDUO

Experimental investigation on cooling effectiveness of a turbine blade under various design conditions

p 513 A87-37846

ZHANG, SHIYING

Working principles of intake fences

p 288 A87-27476

ZHANG, XIAOCHUN

Numerical study of combustion processes in afterburners

p 458 N87-20269

ZHANG, XING

Close form solution for prediction of crack propagation life of structure member and its application to landing gears

p 607 A87-39415

ZHANG, XUELIANG

Convergence of performance calculation of twin spool turbojet and turbopan

p 306 A87-27478

ZHANG, Y. H.

Experimental investigation of piloted flameholders

p 441 N87-20278

ZHANG, YUMIN

Heat transfer through multi-turns of cooling passages in a turbine blade

p 533 A87-37848

ZHANG, ZHI JUN

Experimental investigation on cooling effectiveness of high-temperature air-cooled turbine blade

p 513 A87-37845

ZHANG, ZHONGYIN

Fast methods applied to the calculation of transonic airfoils

p 641 A87-46962

ZHAO, XIAOLU

Transonic stream function solution on S(2) stream surface for a high pressure ratio centrifugal compressor

p 638 A87-46195

ZHAO, XIUHUA

Experimental results of aeroelastic instability of an axial compressor

p 762 A87-49976

ZHAO, YIYUAN

Feedback control for penetrating a downburst

[AIAA PAPER 87-2343] p 771 A87-50462

ZHAO, ZHENYAN

A digital simulation technique for Dryden atmospheric turbulence model

p 310 A87-24715

ZHDANOV, V. T.

Theory and design of flight-vehicle engines

[NASA-TM-88583] p 442 N87-20281

ZHELEZNIK, M. B.

Nonstationary and nonequilibrium air flow in the vicinity of the critical flow line

p 407 A87-31717

ZHELTUKHIN, N. A.

Modeling of large-scale mixing processes in an expanding supersonic jet

p 485 A87-36093

ZHENG, E.

Complementing INS with air data - An improved navigation system

p 578 A87-39411

ZHENG, M.

An antidiffusive numerical method solving supersonic three dimensional viscous separated flows

p 148 A87-18576

ZHENG, Y.

The method of calculating the desired flight path of terrain following technique with circular arc spline

p 111 A87-14136

ZHENHAN, QIN

ACTA aeronautica et astronautica sinica (selected articles)

[AD-A173364] p 276 N87-17661

ZHI, GAO

Acta mechanica sinica (selected articles)

[AD-A176240] p 418 N87-20246

ZHIRITSKII, O. G.

The effect of temperature, protective coatings, and service history on the fatigue strength of gas-turbine engine blades made from the high-temperature cast alloy EP539LM

p 305 A87-26307

ZHOGIN, A. I.

ACAS signal-interference studies carried out in the USSR

p 437 A87-34899

ZHOU, JINGYUE

The predicting method for the performance of the modern supersonic/transonic stage of the axial-flow compressor

p 344 A87-29566

ZHOU, LIHUA

An experimental investigation of the effect of inlet flow distortion on compressor performance

p 805 A87-51813

ZHOU, R.

B-SURF (three-dimensional CAD) system for designing and manufacturing of products with complex contour

p 206 A87-18538

ZHOU, W.

Correlation of experimental static and dynamic response of simple structural components

p 124 A87-13683

ZHOU, XIAOQING

Development of aircraft engine combustors

p 512 A87-37835

Numerical study of combustion processes in afterburners

p 458 N87-20269

ZHOU, XINHAI

Analysis of flowfield on leading edge of transonic blade profile

p 279 A87-23757

Supersonic solution of problems involving analysis and design calculation by streamline curvature method in turbomachinery

p 344 A87-29564

ZHU, D.

A mathematical model for reliability analysis of aircraft structure

p 167 A87-18530

ZHU, DEMAO

Research on control law for active flutter suppression

p 372 A87-29607

ZHU, DEPEI

The reliability and the intensity of aircraft structures

p 383 A87-29601

ZHU, FANGYUAN

Analysis of flowfield on leading edge of transonic blade profile

p 279 A87-23757

Supersonic solution of problems involving analysis and design calculation by streamline curvature method in turbomachinery

p 344 A87-29564

ZHU, HUILING

Random vertex method and simulation of vortex structure behind a triangular prism

p 289 A87-27486

ZHU, NIANGUO

Computer-aided experimental investigation of axial-flow compressors

p 730 A87-49991

ZHU, QIN

A computational method for three-dimensional flow fields of transonic turbine stages and its application

p 486 A87-36916

ZHU, RONGCHU

Development of fuel pump-motor rotational speed control system

p 598 A87-39417

ZHU, SHUJING

A modal synthesis method for multi-substructure systems

p 381 A87-28542

ZHU, XINGJIAN

Convergence of performance calculation of twin spool turbojet and turbopan

p 306 A87-27478

ZHU, XUJIN

A discussion about the mean S2 stream surfaces applied to calculation of quasi-3-D flow in turbomachinery

p 279 A87-23759

ZHU, ZIQIANG

Transonic wing design - Off-design efficiency and effect of fictitious gas parameter

p 551 A87-39409

ZHUANG, BIAONAN

Experimental investigation on compressor stator tandem cascades at high subsonic speed

p 287 A87-25416

Experimental investigation on flow performance of tandem blade cascades with double circular arc profiles

p 730 A87-49989

ZHUANG, LIXIAN

A panel method for predicting the dynamic stability derivatives of an oscillating wing in high subsonic flow

p 641 A87-46951

ZHUANG, P.

The effect of casing treatment on the performance and flowfield in axial compressors

p 184 A87-18531

ZHUANG, ZHONGLIANG

A computer controlled vibratory fatigue test rig with programmed loading for blading

p 315 A87-27490

ZHUK, V. I.

Forced oscillations in a boundary layer at frequencies close to the upper branch of the neutral curve

p 803 A87-50890

ZIEGLER, W.

Lightning strikes to aircraft of the German Federal Armed Forces

p 81 A87-15008

ZIENKIEWICZ, O. C.

Recent developments in FEM-CFD

p 5 A87-11411

CORPORATE SOURCE INDEX

AERONAUTICAL ENGINEERING / A Continuing Bibliography
1987 Cumulative Index

January 1988

Typical Corporate Source Index Listing

Listings in this index are arranged alphabetically by corporate source. The title of the document is used to provide a brief description of the subject matter. The page number and the accession number are included in each entry to assist the user in locating the abstract in the abstract section. If applicable, a report number is also included as an aid in identifying the document.

A

Academy of Sciences (USSR), Moscow.

- Computational aerodynamics of supersonic lifting vehicles p 12 N87-10030
Supersonic flow around tip sides of wings p 12 N87-10033

Advanced Technologies and Testing Labs., Greensboro, N.C.

- Radiative and convective heat transfer over ablating composite flat surface in hypersonic flow regime [AD-A182119] p 810 N87-28503

Advisory Group for Aerospace Research and Development, Neuilly-Sur-Seine (France).

- Engine-Airframe Integration for Rotorcraft [AGARD-LS-148] p 26 N87-10067
Rotorcraft icing: Progress and potential [AGARD-AR-223] p 244 N87-15966
Technical evaluation report on the Flight Mechanics Panel Symposium on Flight Simulation [ISBN-92-835-0399-6] p 258 N87-15985
Practical Application of Finite Element Analysis to Aircraft Structural Design [AGARD-LS-147] p 268 N87-16376
Advanced Joining of Aerospace Metallic Materials [AGARD-CP-398] p 324 N87-17051
Multifunction Radar for Airborne Applications [AGARD-CP-381] p 387 N87-18721
The Repair of Aircraft Structures Involving Composite Materials [AGARD-CP-402] p 403 N87-20174
Patch repair of corroded aircraft skin areas p 406 N87-20191
Applications of Computational Fluid Dynamics in Aeronautics [AGARD-CP-412] p 414 N87-20199
Advanced Instrumentation for Aero Engine Components [AGARD-CP-399] p 467 N87-21170

Efficient Conduct of Individual Flights and Air Traffic or Optimum Utilization of Modern Technology for the Overall Benefit of Civil and Military Airspace Users

[AGARD-CP-410] p 500 N87-21881

Identification of dynamic systems - applications to aircraft. Part 1: The output error approach

[AGARD-AG-300-VOL-3-PT-1] p 508 N87-21913

Microprocessor applications in airborne flight test instrumentation

[AGARD-AG-160-VOL-18] p 511 N87-21920

Transonic and Supersonic Phenomena in Turbomachines

[AGARD-CP-401] p 515 N87-21927

Wake and shock interactions in a transonic turbine stage

p 516 N87-21930

Computation of unsteady flows using the point vortex method

p 536 N87-22138

Efficient conduct of individual flights and air traffic or optimum utilization of modern technology for the overall benefit of civil and military airspace users

[AGARD-AR-236] p 582 N87-23608

Aircraft Dynamic Response to Damaged and Repaired Runways

[AGARD-R-739] p 584 N87-23609

Flight Simulation

[AGARD-CP-408] p 599 N87-23633

Microwave Antennas for Avionics

[AGARD-LS-151] p 613 N87-23859

Aeroelasticity in axial-flow turbomachines. Volume 1: Unsteady turbomachinery aerodynamics

[AGARD-AG-298-VOL-1] p 571 N87-24398

Integrated Design of Advanced Fighters

[AGARD-LS-153] p 586 N87-24445

AGARD corrosion handbook. Volume 2: Aircraft corrosion control documents: A descriptive catalogue

[AGARD-AG-278-VOL-2] p 607 N87-24553

Future Research on Transonic Unsteady Aerodynamics and Its Aeroelastic Applications

[AGARD-R-749] p 812 N87-28518

Advances in Guidance and Control Systems and Technology

[AGARD-CP-411] p 822 N87-29474

AEG-Telefunken, Ulm (West Germany).

Obstacle-warning radar for helicopters

p 132 N87-13149

EHF multifunction phased array antenna

p 388 N87-18752

Dual frequency MM-wave radar for antitank helicopter

p 389 N87-18756

Aircraft antennas/conformal antennas missile antennas

p 613 N87-23862

Aeritalia S.p.A., Turin (Italy).

The use of Aeritalia flight simulator for the development of the AM-X weapon system

p 601 N87-23650

Aerodyne Products Corp., Billerica, Mass.

Portable fuel leak detector

[AD-A180095] p 700 N87-25550

Aerometrics, Inc., Mountain View, Calif.

Optical interferometry in fluid dynamics research

p 851 N87-29447

Aeronautical Radio, Inc., Annapolis, Md.

Communication, Navigation and Surveillance services for the aviation industry using satellite technology

p 500 N87-21886

Aeronautical Research Inst. of Sweden, Stockholm.

Relevance of short fatigue crack growth data for durability and damage tolerance analyses of aircraft

[FFA-TN-1986-23] p 54 N87-11231

Measurements of landing gear loads of a commuter airliner

[FFA-TN-1986-37] p 176 N87-14323

Navier-Stokes solution for laminar transonic flow over a NACA0012 airfoil

[FAA-140] p 291 N87-16794

A comparison of single-block and multi-block grids around wing-fuselage configurations

[FFA-TN-1986-42] p 292 N87-16811

Fatigue life and fastener flexibility of single shear riveted and bolted joints

[FFA-TN-1986-35] p 326 N87-17094

Eigenvalue analysis of 2D aircraft fuselage beam model and fuselage air cavity using a symmetric fluid-structure interaction finite element formulation

[FFA-TN-1986-70] p 303 N87-17698

Development of optimization system OPTSYS: Implementation of static aeroelastic constraints

[FFA-TN-1986-40] p 434 N87-20994

Finite element analysis of three-dimensional structures using adaptive p-extensions

[FFA-TN-1986-57] p 469 N87-21401

Runge-Kutta finite-volume simulation of laminar transonic flow over a NACA 0012 airfoil using the Navier-Stokes equations

[FFA-TN-1986-60] p 574 N87-24429

The Aeronautical Research Institute (FFA) wing body 85 computer program. A panel method for determination of aeroelastic characteristics applying direct block iterative solution techniques

[FFA-TN-1986-28] p 642 N87-25298

Development of a geometry handling program for the FFA subsonic higher order panel method

[FFA-TN-1985-48] p 699 N87-25534

Measurement of noise from airplanes traveling at 3500 to 11000 m altitude

[FFA-TN-1986-21] p 708 N87-25824

A study of environmental noise with a view to aircraft with prop-fans

[FFA-TN-1987-15] p 798 N87-27491

Aeronautical Research Labs., Melbourne (Australia).

Analysis of the vibration of the input bevel pinion in RAN Wessex helicopter main rotor gearbox WAK143 prior to failure

[ARL-AERO-PROP-R-169] p 25 N87-10061

Examination of a technique for the early detection of failure in gears by signal processing of the time domain average of the meshing vibration

[AD-A171031] p 201 N87-13757

A model for the extraction of periodic waveforms by time domain averaging

[AD-A170688] p 207 N87-14066

Helicopter hover performance estimation comparison with UH-1H Iroquois flight data

[AD-A173707] p 244 N87-15963

A flight dynamic simulation program in air-path axes using ACSL (Advanced Continuous Simulation Language)

[AD-A173849] p 332 N87-18337

Fibre composite repair of cracked metallic aircraft components: Practical and basic aspects

p 405 N87-20187

State constraints for predictive control with air vehicle application

[AD-A176205] p 450 N87-21002

Analysis of vibration data from WHL (Westland Helicopters Limited) Wessex fatigue test trial 3

[AD-A176208] p 450 N87-21003

Preliminary investigation of the use of holographic interferometry to detect ill-fitting compressor blades

[AD-A178519] p 520 N87-22682

An improved computational procedure for the unsteady doublet lattice method

[ARL-STRUC-R-423] p 619 N87-24934

The effect of rotor wake geometry variation on hover induced power estimation for a UH-1H Iroquois helicopter

[AD-A180787] p 732 N87-26867

Validation of the ARL (Aeronautical Research Laboratories) mathematical model of the Sea King Mk 50 helicopter

[AD-A181314] p 752 N87-26901

An investigation of some simple models for the F/A-18 flight dynamics

[AD-A181638] p 752 N87-26903

The computed gust response of an aircraft. The relative effect of various degrees of freedom

[AD-A180968] p 775 N87-26916

Interpolation techniques for the time domain averaging of vibration data with application to helicopter gearbox monitoring

[AD-A182572] p 754 N87-27662

A summary of Reynolds number effects on some recent tests in the Langley 0.3-meter transonic cryogenic tunnel

[SAE PAPER 861765] p 409 A87-32626

A summary of the effects of Reynolds number on drag divergence for airfoils tested in the Langley 0.3-meter transonic cryogenic tunnel

[SAE PAPER 861767] p 409 A87-32627

Large eddy breakup devices as low Reynolds number airfoils

[SAE PAPER 861769] p 409 A87-32629

Flight testing TECS - The Total Energy Control System

[SAE PAPER 861803] p 444 A87-32648

Transition to space - A history of 'space plane' concepts at Langley Aeronautical Laboratory 1952-1957

p 478 A87-33152

Concepts for reduction of blade/vortex interaction noise

p 428 A87-33245

Further generalization of an equivalent plate representation for aircraft structural analysis

[AIAA PAPER 87-0721] p 463 A87-33562

Postbuckling and failure characteristics of stiffened graphite-epoxy shear webs

[AIAA PAPER 87-0733] p 463 A87-33572

A method of predicting the energy-absorption capability of composite subfloor beams

[AIAA PAPER 87-0800] p 464 A87-33600

Investigation of transonic region of high dynamic response encountered on an elastic supercritical wing

[AIAA PAPER 87-0735] p 411 A87-33662

Unsteady transonic flow calculations for realistic aircraft configurations

[AIAA PAPER 87-0850] p 411 A87-33690

Calculation of steady and unsteady pressures on wings at supersonic speeds with a transonic small disturbance code

[AIAA PAPER 87-0851] p 411 A87-33691

Nonlinear programming extensions to rational function approximations of unsteady aerodynamics

[AIAA PAPER 87-0854] p 412 A87-33694

Flutter study of an advanced composite wing with external stores

[AIAA PAPER 87-0880] p 446 A87-33701

Active suppression of an 'apparent shock induced instability'

[AIAA PAPER 87-0881] p 446 A87-33702

Measured unsteady transonic aerodynamic characteristics of an elastic supercritical wing

p 412 A87-34505

Forebody vortex management for yaw control at high angles of attack

p 447 A87-34508

Structural analysis of the controlled impact demonstration of a jet transport airplane

p 430 A87-34512

An assessment of the small-crack effect for 2024-T3 aluminum alloy

p 457 A87-34668

The pultrusion process for structures on advanced aerospace transportation systems

[SAWE PAPER 1741] p 532 A87-36303

Semi-interpenetrating networks of LARC-TPI

p 529 A87-36602

Efficient calculation of chemically reacting flow

p 607 A87-39539

Shaping of airplane fuselages for minimum drag

p 553 A87-39889

Interference effects of thrust reversing on horizontal tail effectiveness of twin-engine fighter aircraft at Mach numbers from 0.15 to 0.90
[NASA-TP-2350] p 36 N87-10870

Forward-swept wing configuration designed for high maneuverability by use of a transonic computational method
[NASA-TP-2628] p 75 N87-11702

Recent Experiences in Multidisciplinary Analysis and Optimization, part 1
[NASA-CP-2327-PT-1] p 96 N87-11717

Experiences performing conceptual design optimization of transport aircraft
p 97 N87-11723

Application of optimization techniques to the design of a flutter suppression control law for the DAST ARW-2
p 115 N87-11736

Calculated effects of varying Reynolds Number and dynamic pressure on flexible wings at transonic speeds
p 75 N87-11738

Multidisciplinary systems optimization by linear decomposition
p 136 N87-11740

Recent Experiences in Multidisciplinary Analysis and Optimization, part 2
[NASA-CP-2327-PT-2] p 99 N87-11750

Helicopter rotor blade aerodynamic optimization by mathematical programming
p 99 N87-11753

A description of the active and passive sidewall-boundary-layer removal systems of the 0.3-meter transonic cryogenic tunnel
[NASA-TM-87764] p 118 N87-11801

Mach 6 experimental and theoretical stability and performance of a finned cylindrical body at angles of attack up to 65 deg
[NASA-TM-89050] p 76 N87-12538

Effect of port corner geometry on the internal performance of a rotating-vane-type thrust reverser
[NASA-TP-2624] p 77 N87-12541

Evaluation of a nonlinear parameter extraction mathematical model including the term $C(\text{sub}(\text{sub} \Delta e \text{ squared}))$
[NASA-TM-87731] p 116 N87-12566

Longitudinal aerodynamic characteristics of a generic fighter model with a wing designed for sustained transonic maneuver conditions
[NASA-TM-87729] p 150 N87-13404

Computer code to interchange CDS and wave-drag geometry formats
[NASA-TM-88988] p 172 N87-13427

Development and evaluation of an airplane electronic display format aligned with the inertial velocity vector
[NASA-TP-2648] p 182 N87-13438

Wind tunnel wall interference in V/STOL and high lift testing: A selected, annotated bibliography
[NASA-TM-89066] p 193 N87-13450

Aerothermal tests of spherical dome protuberances on a flat plate at a Mach number of 6.5
[NASA-TP-2631] p 201 N87-13664

Effects of winglet on transonic flutter characteristics of a cantilevered twin-engine-transport wing model
[NASA-TP-2627] p 201 N87-13789

Effects of background noise on total noise annoyance
[NASA-TP-2630] p 208 N87-14120

High lift, low pitching moment airfoils
[NASA-CASE-LAR-13215-1] p 153 N87-14282

Remote pivot decoupler pylon: Wing/store flutter suppressor
[NASA-CASE-LAR-13173-1] p 175 N87-14314

Applicability of linearized-theory attached-flow methods to design and analysis of flap systems at low speeds for thin swept wings with sharp leading edges
[NASA-TP-2653] p 230 N87-15174

An efficient algorithm for solution of the unsteady transonic small-disturbance equation
[NASA-TM-89014] p 230 N87-15176

Subsonic maneuver capability of a supersonic cruise fighter wing concept

Aircraft noise synthesis system: Version 4 user instructions
[NASA-TM-89089] p 477 N87-20797

Airplane automatic control force trimming device for asymmetric engine failures
[NASA-CASE-LAR-13280-1] p 449 N87-20999

Acoustic guide for noise-transmission testing of aircraft
[NASA-CASE-LAR-13111-1-CU] p 477 N87-21652

Wind-tunnel free-flight investigation of a 0.15-scale model of the F-106B airplane with vortex flaps
[NASA-TP-2700] p 490 N87-21855

New methods and results for quantification of lightning-aircraft electrostatics
[NASA-TP-2737] p 492 N87-21871

Effects of afterbody boattail design and empennage arrangement on aeropropulsive characteristics of a twin-engine fighter model at transonic speeds
[NASA-TP-2704] p 492 N87-21873

Computational methods for unsteady transonic flows
[NASA-TM-89106] p 492 N87-21874

Advanced ATC: An aircraft perspective
p 501 N87-21893

Fuel penalties and time flexibility of 4D flight profiles under modeled wind conditions
[NASA-TM-89128] p 509 N87-21917

The effects of display and autopilot functions on pilot workload for Single Pilot Instrument Flight Rule (SPIFR) operations
[NASA-CR-4073] p 512 N87-21921

Static aeroelastic effects on the flutter of a supercritical wing
[NASA-TM-89132] p 540 N87-22270

An experimental investigation of the aeromechanical stability of a hingeless rotor in hover and forward flight
[NASA-TM-89107] p 540 N87-22276

Atmospheric Turbulence Relative to Aviation, Missile, and Space Programs
[NASA-CP-2468] p 543 N87-22341

Measurements of atmospheric turbulence
p 543 N87-22347

Example on how to model and simulate turbulence for flight simulators
p 543 N87-22353

Langley aerospace test highlights - 1986
[NASA-TM-89144] p 550 N87-22602

Joint University Program for Air Transportation Research, 1984
[NASA-CP-2452] p 483 N87-22604

Aircraft control position indicator
[NASA-CASE-LAR-12984-1] p 512 N87-22678

Crossflow vorticity sensor
[NASA-CASE-LAR-13436-1-CU] p 570 N87-23587

Effect of a trade between boattail angle and wedge size on the performance of a nonaxisymmetric wedge nozzle
[NASA-TP-2717] p 570 N87-23593

High Reynolds Number tests of the NASA SC(2)-0012 airfoil in the Langley 0.3-meter transonic cryogenic tunnel
[NASA-TM-89102] p 571 N87-23594

Study of lee-side flows over conically cambered delta wings at supersonic speeds, part 1
[NASA-TP-2660-PT-1] p 571 N87-23597

Flight investigation of the effects of an outboard wing-leading-edge modification on stall/spin characteristics of a low-wing, single-engine, T-tail light airplane
[NASA-TP-2691] p 585 N87-23614

Helicopter anti-torque system using fuselage strakes
[NASA-CASE-LAR-13630-1] p 597 N87-23630

Plasma torch igniter for scramjets
p 605 N87-23789

Opposed jet burner studies of silane-methane, silane-hydrogen and hydrogen diffusion flames with air
p 605 N87-23791

Extension of Kirchhoff's formula to radiation from moving surfaces
[NASA-TM-89149] p 620 N87-24160

Annoyance response to simulated advanced turboprop aircraft interior noise containing tonal beats
[NASA-TP-2689] p 620 N87-24161

Engineer in charge: A history of the Langley Aeronautical Laboratory, 1917-1958
[NASA-SP-4305] p 621 N87-24390

Effects of ground proximity on a low aspect ratio propulsive wing/canard configuration
p 573 N87-24422

Helicopter blade dynamic loads measured during performance testing of two scaled rotors
[NASA-TM-89053] p 573 N87-24423

Static internal performance of a two-dimensional convergent-divergent nozzle with thrust vectoring
[NASA-TP-2721] p 574 N87-24432

Multiaxis control power from thrust vectoring for a supersonic fighter aircraft model at Mach 0.20 to 2.47 [NASA-TP-2712] p 574 N87-24433

Measurements of flow rate and trajectory of aircraft tire-generated water spray [NASA-TP-2718] p 588 N87-24458

Helicopter having a disengageable tail rotor [NASA-CASE-LAR-13609-1] p 588 N87-24460

Improved control surface actuator [NASA-CASE-LAR-12852-1] p 588 N87-24461

Multiscale turbulence effects in supersonic jets exhausting into still air [NASA-TP-2707] p 614 N87-24672

Acoustic fatigue: Overview of activities at NASA Langley [NASA-TM-89143] p 620 N87-24965

Optical data transfer system for crossing a rotary joint [NASA-CASE-LAR-13613-1-SB] p 621 N87-24984

Wind Shear/Turbulence Inputs to Flight Simulation and Systems Certification [NASA-CP-2474] p 625 N87-25267

Wind shear and turbulence simulation p 703 N87-25274

Flight duration, airspeed practices and altitude management of airplanes involved in the NASA VGH General Aviation Program [NASA-TM-89074] p 625 N87-25293

Subsonic wind-tunnel measurements of a slender wing-body configuration employing a vortex flap [NASA-TM-89101] p 642 N87-25295

Study of lee-side flows over conically cambered Delta wings at supersonic speeds, part 2 [NASA-TP-2660-PT-2] p 643 N87-25301

Effect of planform taper on hover performance of an advanced AH-64 model rotor [NASA-TM-89145] p 643 N87-25304

On the nonlinear aerodynamic and stability characteristics of a generic chine-forebody slender-wing fighter configuration [NASA-TM-89447] p 643 N87-25305

A multi-body aircraft with an all-movable center fuselage actively controlling fuselage pressure drag [NASA-CASE-LAR-13511-1] p 658 N87-25320

Integrally-stiffened crash energy-absorbing subfloor beam structure [NASA-CASE-LAR-13697-1] p 659 N87-25321

Airfoil flutter model suspension system [NASA-CASE-LAR-13522-1-SB] p 687 N87-25334

Preliminary structural design of composite main rotor blades for minimum weight [NASA-TP-2730] p 691 N87-25435

Truss-core corrugation for compression loads [NASA-CASE-LAR-13438-1] p 699 N87-25496

Miniature remote dead weight calibrator [NASA-CASE-LAR-13564-1] p 700 N87-25558

Auxiliary data input device [NASA-CASE-LAR-13626-1] p 700 N87-25584

Survey of currently available high-resolution raster graphics systems [NASA-TM-89139] p 705 N87-25771

Effect of signal jitter on the spectrum of rotor impulsive noise [NASA-TM-100477] p 708 N87-25827

Detailed near-wake flowfield surveys with comparison to an Euler method of an aspect ratio 4 rectangular wing [NASA-TM-89357] p 644 N87-25993

Computational analysis of hypersonic airbreathing aircraft flow fields p 645 N87-26019

Effect of Reynolds number variation on aerodynamics of a hydrogen-fueled transport concept at Mach 6 [NASA-TP-2728] p 645 N87-26031

Steady and unsteady aerodynamic forces from the SOUSSA surface-panel method for a fighter wing with tip missile and comparison with experiment and PANAIR [NASA-TP-2736] p 645 N87-26032

Low-speed wind-tunnel results for symmetrical NASA LS(1)-0013 airfoil [NASA-TM-4003] p 645 N87-26033

Evaluation of installed performance of a wing-tip-mounted pusher turboprop on a semispan wing [NASA-TP-2739] p 659 N87-26041

Optimization methods applied to the aerodynamic design of helicopter rotor blades [NASA-TM-89155] p 660 N87-26042

Subsonic longitudinal and lateral-directional characteristics of a forward-swept-wing fighter configuration at angles of attack up to 47 deg [NASA-TP-2727] p 732 N87-26874

Operational performance of vapor-screen systems for in-flight visualization of leading-edge vortices on the F-106B aircraft [NASA-TM-4004] p 732 N87-26877

Wind-tunnel evaluation of an advanced main-rotor blade design for a utility-class helicopter [NASA-TM-89129] p 733 N87-26878

An experimental investigation of an advanced turboprop installation on a swept wing at subsonic and transonic speeds [NASA-TP-2729] p 733 N87-26883

Piloted simulator study of allowable time delay in pitch flight control system of a transport airplane with negative static stability [NASA-TM-89147] p 776 N87-26919

Piloted-simulation study of effects of vortex flaps on low-speed handling qualities of a Delta-wing airplane [NASA-TP-2747] p 776 N87-26922

Experimental study of shock wave interference heating on a cylindrical leading edge [NASA-TM-100484] p 789 N87-27154

NASTRAN application for the prediction of aircraft interior noise p 797 N87-27248

Joint University Program for Air Transportation Research, 1985 [NAS 1.55:2453] p 715 N87-27596

Calculation of viscous effects on transonic flow for oscillating airfoils and comparisons with experiment [NASA-TP-2731] p 734 N87-27622

Drag measurements of blunt stores tangentially mounted on a flat plate at supersonic speeds [NASA-TP-2742] p 734 N87-27626

Pressure measurements on a thick cambered and twisted 58 deg delta wing at high subsonic speeds [NASA-TP-2713] p 735 N87-27643

Unique research challenges for high-speed civil transports [NASA-TM-100490] p 740 N87-27651

Integration of altitude and airspeed information into a primary flight display via moving-tape formats: Evaluation during random tracking task [NASA-TM-4010] p 758 N87-27665

The effects of aeroelastic deformation on the unaugmented stopped-rotor dynamics of an X-Wing aircraft [NASA-TM-100480] p 791 N87-28056

Traditional versus rule-based programming techniques: Application to the control of optional flight information [NASA-TM-89161] p 795 N87-28275

Evolution, calibration, and operational characteristics of the two-dimensional test section of the Langley 0.3-meter transonic cryogenic tunnel [NASA-TP-2749] p 839 N87-28570

Standard test evaluation of graphite fiber/resin matrix composite materials for improved toughness [NASA-TM-86298] p 845 N87-28618

Thermal fatigue tests of a radiative heat shield panel for a hypersonic transport [NASA-TM-87583] p 845 N87-28643

The SIFT hardware/software systems. Volume 1: A detailed description [NASA-TM-87574] p 858 N87-29186

Low-speed aerodynamic characteristics of a twin-engine general aviation configuration with aft-fuselage-mounted pusher propellers [NASA-TP-2763] p 817 N87-29462

Jet transport flight operations using cockpit display of traffic information during instrument meteorological conditions: Simulation evaluation [NASA-TP-2567] p 819 N87-29469

Qualitative evaluation of a flush air data system at transonic speeds and high angles of attack [NASA-TP-2716] p 827 N87-29497

A vector-based failure detection and isolation algorithm for a dual fail-operational redundant strapdown inertial measurement unit [NASA-TM-100493] p 829 N87-29531

Langley Aircraft Landing Dynamics Facility [NASA-RP-1189] p 839 N87-29544

The ACEE program and basic composites research at Langley Research Center (1975 to 1986): Summary and bibliography [NASA-RP-1177] p 846 N87-29612

Elevated temperature aluminum alloys [NASA-CASE-LAR-13632-1] p 846 N87-29650

Acoustic effects on profile drag of a laminar flow airfoil [NASA-TM-100505] p 860 N87-30155

National Aeronautics and Space Administration. Lewis Research Center, Cleveland, Ohio.

Fiber-reinforced superalloy composites provide an added performance edge p 39 A87-12647

A real-time simulation evaluation of an advanced detection, isolation and accommodation algorithm for sensor failures in turbine engines p 103 A87-13318

Polymer, metal, and ceramic matrix composites for advanced aircraft engine applications p 121 A87-15187

Modeling the effects of wind tunnel wall absorption on the acoustic radiation characteristics of propellers [AIAA PAPER 86-1876] p 208 A87-17991

An overview of the small engine component technology (SECT) studies [AIAA PAPER 86-1542] p 184 A87-17993

In-flight photogrammetric measurement of wing ice accretions [AIAA PAPER 86-0483] p 155 A87-17995

Fabrication and quality assurance processes for superhybrid composite fan blades p 195 A87-19123

Folding tilt rotor demonstrator feasibility study p 169 A87-19247

Visualization of flows in a motored rotary combustion engine using holographic interferometry [AIAA PAPER 86-1557] p 248 A87-21514

Particle trajectory computer program for icing analysis of axisymmetric bodies - A progress report [AIAA PAPER 87-0027] p 234 A87-22366

In-flight measurement of ice growth on an airfoil using an array of ultrasonic transducers [AIAA PAPER 87-0178] p 234 A87-22464

Three-dimensional trajectory analyses of two drop sizing instruments - PMS OAP and PMS FSSP [AIAA PAPER 87-0180] p 265 A87-22466

A heater made from graphite composite material for potential deicing application [AIAA PAPER 87-0025] p 297 A87-24905

High-speed propeller noise predictions - Effects of boundary conditions used in blade loading calculations [AIAA PAPER 87-0525] p 333 A87-24978

A numerical simulation of the inviscid flow through a counterrotating propeller [ASME PAPER 86-GT-138] p 287 A87-25395

The effect of circumferential aerodynamic detuning on coupled bending-torsion unstalled supersonic flutter [ASME PAPER 86-GT-100] p 304 A87-25396

Two- and three-dimensional viscous computations of a hypersonic inlet flow [AIAA PAPER 87-0283] p 346 A87-31106

Measured noise of a scale model high speed propeller at simulated takeoff/approach conditions [AIAA PAPER 87-0526] p 397 A87-31109

Structureborne noise control in advanced turboprop aircraft [AIAA PAPER 87-0530] p 397 A87-31110

Aircraft turbofan noise p 398 A87-31144

Prediction of the structure of fuel sprays in cylindrical combustion chambers p 369 A87-31277

A model propulsion simulator for evaluating counter rotating blade characteristics [SAE PAPER 861715] p 440 A87-32607

Optimization and analysis of gas turbine engine blades [AIAA PAPER 87-0827] p 475 A87-33614

Structural tailoring of advanced turboprops [AIAA PAPER 87-0753] p 464 A87-33648

A technique for the prediction of airfoil flutter characteristics in separated flow [AIAA PAPER 87-0910] p 464 A87-33719

Analysis of viscous transonic flow over airfoil sections [AIAA PAPER 87-0420] p 413 A87-34723

Investigation of two-dimensional shock-wave/boundary-layer interactions p 552 A87-39528

Effects of multiple rows and noncircular orifices on dilution jet mixing p 608 A87-39805

Euler analysis of transonic propeller flows p 553 A87-39813

Analytical and experimental investigation of mistuning in propfan flutter [AIAA PAPER 87-0739] p 609 A87-40496

Analytical flutter investigation of a composite propfan model [AIAA PAPER 87-0738] p 609 A87-40497

Numerical simulation of transonic propeller flow using a three-dimensional small disturbance code employing novel helical coordinates [AIAA PAPER 87-1162] p 560 A87-42107

An LDA investigation of three-dimensional normal shock-boundary layer interactions in a corner [AIAA PAPER 87-1369] p 632 A87-44938

Full-scale thrust reverser testing in an altitude facility [AIAA PAPER 87-1788] p 684 A87-45203

Contingency power for small turboshaft engines using water injection into turbine cooling air [AIAA PAPER 87-1906] p 668 A87-45289

NASA/GE advanced low emissions combustor program [AIAA PAPER 87-2035] p 671 A87-45369

Two-dimensional nozzle plume characteristics [AIAA PAPER 87-2111] p 636 A87-45413

Secondary stream and excitation effects on two-dimensional nozzle plume characteristics [AIAA PAPER 87-2112] p 637 A87-45414

Influence of third-degree geometric nonlinearities on the vibration and stability of pretwisted, precone, rotating blades p 674 A87-46228

Aeroelastic control of stability and forced response of supersonic rotors by aerodynamic detuning p 676 A87-46249

Opportunities and challenges in heat transfer - From the perspective of the government laboratory

p 787 A87-48313

Supersonic through-flow fan design

[AIAA PAPER 87-1746] p 759 A87-48571

Euler analysis of the three-dimensional flow field of a high-speed propeller - Boundary condition effects

[ASME PAPER 87-GT-253] p 719 A87-48719

Evaluation of icing drag coefficient correlations applied to iced propeller performance prediction

[SAE PAPER 871033] p 737 A87-48761

Advanced liquid-cooled, turbocharged and intercooled stratified charge rotary engines for aircraft

[SAE PAPER 871039] p 759 A87-48766

Numerical simulations of unsteady, viscous, transonic flow over isolated and cascaded airfoils using a deforming grid

[AIAA PAPER 87-1316] p 729 A87-49649

Method for the determination of the three dimensional aerodynamic field of a rotor-stator combination in compressible flow

[AIAA PAPER 87-1742] p 730 A87-50187

Performance of two 10-lb/sec centrifugal compressors with different blade and shroud thicknesses operating over a range of Reynolds numbers

[AIAA PAPER 87-1745] p 762 A87-50188

Liner cooling research at NASA Lewis Research Center

[AIAA PAPER 87-1828] p 762 A87-50189

Reactivation study for NASA Lewis Research Center's Hypersonic Tunnel Facility

[AIAA PAPER 87-1886] p 779 A87-50190

The supersonic through-flow turbofan for high Mach propulsion

[AIAA PAPER 87-2050] p 763 A87-50196

Full-scale engine demonstration of an advanced sensor failure detection isolation, and accommodation algorithm - Preliminary results

[AIAA PAPER 87-2259] p 763 A87-50422

Static tests of the propulsion system

[AIAA PAPER 87-1728] p 830 A87-52245

A variable geometry combustor for broadened properties fuels

[AIAA PAPER 87-1832] p 830 A87-52246

Wind tunnel performance results of an aeroelastically scaled 2/9 model of the PTA flight test prop-fan

[AIAA PAPER 87-1893] p 806 A87-52251

The NASA strain gage laboratory

p 838 A87-52494

Mathematical model partitioning and packing for parallel computer calculation

p 856 A87-52534

Structural ceramics in heat engines - The NASA viewpoint

p 842 A87-53352

New generation methods for spur, helical, and spiral-bevel gears

p 849 A87-53420

Compound cycle engine program

p 831 A87-53428

New ZrO₂-Yb₂O₃ plasma-sprayed coatings for thermal barrier applications

p 843 A87-53623

Response of a small-turboshaft-engine compression system to inlet temperature distortion

[NASA-TM-83765] p 35 A87-10100

Testing of UH-60A helicopter transmission in NASA Lewis 2240-kW (3000-hp) facility

[NASA-TP-2626] p 50 A87-10391

FOREIGN TECHNOLOGY INDEX

AERONAUTICAL ENGINEERING / A Continuing Bibliography
1987 Cumulative Index

January 1988

Typical Foreign Technology Index Listing

Listings in this index are arranged alphabetically by country of intellectual origin. The title of the document is used to provide a brief description of the subject matter. The page number and the accession number are included in each entry to assist the user in locating the citation in the abstract section. If applicable, a report number is also included as an aid in identifying the document.

A

ARGENTINA

Damage tolerance concepts for modern helicopters
p 653 A87-43449

Autonomous navigation system for the new generation of military helicopters and associated flight tests
p 648 A87-43469

EMI-fault prevention and self recovery of digital flight control systems
p 661 A87-43470

The tilt-rotor aircraft - A response to the future? From European interrogations to Eurofar actions
[MBB-UD-485-86-PUB] p 654 A87-43474

Integrated navigation, communication and surveillance systems based on standard distance measuring equipment
p 649 A87-44039

The Airbus rudder - An example of new fabrication technologies
p 623 A87-44228

A310-300 CFRP fin - Damage tolerance demonstration
p 655 A87-44594

Radar Technology 1986; Symposium, 6th, Bremen, West Germany, Nov. 4-6, 1986, Reports
p 697 A87-45876

The quality of radar data and its determination at the radar installations of the Bundesanstalt fuer Flugsicherung
p 650 A87-45878

Radar requirements for future avionics systems
p 662 A87-45879

An automated radar-signature measurement system
p 698 A87-45886

Thrust vectoring - Why and how?
p 673 A87-46180

Improved agility for modern fighter aircraft. II - Thrust vectoring engine nozzles
p 673 A87-46181

Flow phenomena in transonic turbine cascades detailed experimental and numerical investigation
p 639 A87-46223

The mixing of jets under simulated engine-like turbulence
p 698 A87-46231

Advances in technology for low cost turbomachinery - A potential to enhance the economy of future propulsion system for general and helicopter aviation
p 676 A87-46261

Dornier 328 - Concept for a new-generation regional airliner
p 657 A87-46326

Technological aspects in preparing the development of regional airliners
p 657 A87-46327

Aerothermodynamic computations for super-/hypersonic flight
p 640 A87-46328

Large-scale distribution of peroxyacetylnitrate results from the STRATOZ III flights
p 702 A87-46481

Compressible flows in the wakes of a square cylinder and thick symmetrical airfoil arranged in tandem
p 641 A87-46922

Transonic supersonic flows
p 717 A87-47664

Pressure waves - Boundary layer interaction
p 717 A87-47665

Experimental determination of position of vortex core at higher angle of attack in transonic-supersonic flow
p 717 A87-47673

Theoretical prediction of aerodynamic characteristics on wings in transonic-supersonic flow at higher angle of attack and its agreement with experimental results
p 717 A87-47674

Development efficient algorithms for the solutions of full potential and Euler equations on vector computers
p 718 A87-47853

Yearbook 1986 II; DGLR, Annual Meeting, Munich, West Germany, Oct. 8-10, 1986, Reports
p 711 A87-48154

Aircraft technology of the 1990s in transport-aircraft projects at MBB
p 711 A87-48158

[DGLR PAPER 86-108] p 711 A87-48158

Thrust vectoring - Why and how?
p 744 A87-48159

[DGLR PAPER 86-111] p 744 A87-48159

Problems in seaplane research
p 744 A87-48160

[DGLR PAPER 86-126] p 744 A87-48160

The future use of the European Transonic Wind Tunnel ETW in the development of advanced aircraft
p 777 A87-48162

[DGLR PAPER 86-140] p 777 A87-48162

Possibilities and methods of structural optimization
p 787 A87-48164

[DGLR PAPER 86-166] p 787 A87-48164

From Ostztal to Modane - From the history of the large high-speed wind tunnel 'Bauvorhaben 101' of the Luftfahrtforschungsanstalt Muenchen (LFM), later ONERA facility S1 MA
p 777 A87-48165

Remarks on the development history of the tip-jet-rotor helicopter
p 800 A87-48166

Structures technology of modern general aviation aircraft
p 712 A87-48689

[SAE PAPER 871025] p 712 A87-48689

Supercritical cascade flow analysis with shock - Boundary layer interaction and shock-free redesign
p 719 A87-48724

Selected problems in the decision making process for future small transport/utility aircraft
p 712 A87-48771

[SAE PAPER 871045] p 712 A87-48771

Flight tests confirming the operability of night vision display cockpits for the new helicopters
p 756 A87-48918

A new method for low cost testing and evaluation of helicopter cockpits during design and development phases
p 745 A87-48920

Beam index display - The answer to modern helicopter cockpit design
p 756 A87-48921

Evaluation of a pilot's line-of-sight using ultrasonic measurements
p 756 A87-48922

The aerodynamic calculation of counter rotating coaxial rotors
p 720 A87-48925

Influence of rear end spoiler on aerodynamic characteristics and wake structure of a helicopter fuselage
p 721 A87-48930

Modern technologies for future light helicopters
p 712 A87-48934

Three-dimensional computer aided design systems - Impacts on future helicopter design work
p 746 A87-48936

An application of Floquet theory to investigate helicopter mechanical instability using a spatial model including rotor blade flapping
p 746 A87-48952

Investigations of blade-vortices in the rotor-downstream
p 721 A87-48970

Theoretical and experimental investigations on a six-component rotor balance
p 778 A87-48971

DFVLR-F5 test wing experiment for computational aerodynamics
p 727 A87-49099

[AIAA PAPER 87-2485] p 727 A87-49099

Pseudo Reynolds number trends
p 778 A87-49111

[AIAA PAPER 87-2612] p 778 A87-49111

Burner rig tests on coated anisotropic high temperature alloys
p 783 A87-49553

Process and equipment for PVD and LPPS overlay coatings on aircraft gas turbine parts
p 788 A87-49555

International Helicopter Forum, 16th, Bueckeburg, West Germany, June 11, 12, 1986 and International Aerospace Exhibition, Hanover, West Germany, June 6-15, 1986, Reports
p 714 A87-49638

New developments in military and civil helicopters in Western Europe
p 714 A87-49639

Bus systems
p 757 A87-49640

Navigation
p 741 A87-49641

Equipment for night fighting capability in helicopters
p 738 A87-49642

Helicopter survivability
p 714 A87-49643

New developments in dynamic helicopter components
p 714 A87-49645

Conceptual studies of control systems for the variable-camber wing
p 769 A87-49960

[MBB-UT-221-86-PUB] p 769 A87-49960

Interactive development of structural components for lightweight fiber-reinforced composite designs - The case of the Airbus vertical tails
p 750 A87-49964

[MBB-UT-023-86] p 750 A87-49964

Compatibility aspects of active control technologies with aircraft structure design
p 770 A87-49965

Observations on the turbulent structure in an unsteady, normal shock/boundary-layer interaction
[PNR90361] p 323 N87-17010

NDT of electron beam welded joints (micro-focus and real time X-ray)
p 325 N87-17063

A comparison of aerodynamic measurements of the transonic flow through a plane turbine cascade in four European wind tunnels
[OUEL-1624/86] p 294 N87-17682

A review of the performance of swept tip helicopter main rotor blades and an analysis of aeroacoustical effects
[ETN-87-98936] p 302 N87-17696

Use of composites in propulsion systems
[PNR-90323] p 310 N87-17707

The use of new technology in the control of civil air traffic at airway junctions
[AD-A174303] p 357 N87-18557

BAE Wharton Hot Gas Laboratory
[ARG-207] p 376 N87-18577

Multifunction millimetre-wave radar for all-weather ground attack aircraft
p 387 N87-18725

The performance of aerofoils with lift devices at low Reynolds numbers for use on RPV wings
[BU-332] p 350 N87-19363

Lift-interference and blockage corrections for a two-dimensional aerofoil during a sudden change of incidence
[BU-334] p 350 N87-19364

An investigation into the static pressure distribution and lift reduction over an aerofoil due to a forward spoiler
[BU-346] p 350 N87-19366

The feasibility of aircraft with rotating cylinder wings
[BU-327] p 364 N87-19390

Installation of a radiator in a light aircraft
[BU-330] p 365 N87-19391

Construction and test of a composite microlight wing structure
[BU-341] p 365 N87-19392

Evaluation of a flight dynamics computer program
[BU-321] p 375 N87-19404

An evaluation of the TSIM control systems computer package
[BU-336] p 375 N87-19406

A digital simulation of the failure performance of a multiplex actuator
[BU-337] p 375 N87-19407

Flight simulator with transputers
[BU-333] p 378 N87-19415

Vortex/boundary layer interaction
[NASA-CR-180255] p 391 N87-19646

An investigation of spray impact forces
[BU-340] p 392 N87-19697

The application of parallel processing to real time flight simulation using the OCCAM language
[BU-350] p 396 N87-19961

Effect of adhesive bonding variables on the performance of bonded CFRP patch repairs of metallic structures
p 404 N87-20182

British Airways experience with composite repairs
p 406 N87-20192

A discussion on a mesh generation technique applicable to complex geometries
p 475 N87-20201

An assessment of the use of low-order panel methods for the calculation of supersonic flows
p 476 N87-20204

Applications and developments of computational methods for the aerodynamic problems of complex configurations
p 415 N87-20209

The integration of computational fluid dynamics into the military aircraft design process
p 431 N87-20210

Comparison of finite difference calculations of a large region of recirculating flow near an airfoil trailing edge
p 415 N87-20218

Applications of RAE viscous flow methods near separation boundaries for three-dimensional wings in transonic flow
p 416 N87-20224

Investigation of flow under the fuselage of a powered light aircraft model
[BU-351] p 418 N87-20247

The aerodynamic effects of a serrated strip near the leading edge of an airfoil
[ETN-87-99480] p 418 N87-20248

A preliminary study into the constant drag parachute for aircrew escape systems
[BU-345] p 421 N87-20256

Helicopter external load operations
[CAP-426] p 432 N87-20259

Materials selection and design study of a composite microlight wing structure
[BU-335] p 432 N87-20263

Simulation of an integrated fire and flight control system for air-to-air gunnery
[ETN-87-99479] p 449 N87-20293

An investigation into the factors affecting the flow quality in a small suction wind tunnel
[BU-344] p 453 N87-20299

Light aircraft maintenance. General guidance on implementation of the Light Aircraft Maintenance Scheme (LAMS), for aircraft not exceeding 2730 kg MTWA, with a certificate of airworthiness in the transport, aerial work or private category
[CAP-520] p 406 N87-20954

Ground de-icing of aircraft
[CAP-512] p 422 N87-20975

Extended Range Twin Operations (ETOPS)
[CAP-513] p 422 N87-20976

Aileron reversal of swept wings with crossflexibilities
[RAE-TR-83023] p 433 N87-20988

Wing divergence and structural distortion
[RAE-TR-85057] p 433 N87-20989

Divergence and flutter of swept-forward wings with crossflexibilities
[RAE-TR-80047] p 449 N87-21000

Electronic display equipment for use in the advanced flight deck simulator at British Aerospace, Weybridge
[RID-1912] p 453 N87-21005

Velocity and temperature measurements in a can-type gas-turbine combustor
p 443 N87-21184

Developments in data acquisition and processing using an advanced combustion research facility
p 454 N87-21192

The application of holography as a transonic flow diagnostic to rotating components in turbomachinery
p 468 N87-21202

Exploiting the capabilities of flight management systems in solving the airport arrival problem
p 502 N87-21899

Some experiences in integrating avionics systems on the civil flight deck
p 511 N87-21902

Semi-automatic cross-checking between different copies of the same flight plan
p 502 N87-21903

The application of intelligent knowledge based systems to air traffic control
p 503 N87-21904

Wake and shock interactions in a transonic turbine stage
p 516 N87-21930

Measured and predicted loss generation in transonic turbine blading
p 516 N87-21934

A numerical study of the 3D flowfield in a transonic compressor rotor with a modelling of the tip clearance flow
p 518 N87-21945

Some turbomachinery blade passage analysis methods: Retrospect and prospect
p 518 N87-21947

Non-linear identification of a squeeze-film damper
p 538 N87-22213

A novel form of damper for turbo-machinery
p 539 N87-22216

Non-linear performance of a three-bearing rotor incorporating a squeeze-film damper
p 539 N87-22217

Cost analysis of aircraft projects
p 483 N87-22664

Evolution of combat performance of the Hawk light combat aircraft
p 509 N87-22668

Propulsion system technologies for thrust vectoring
p 519 N87-22677

Improved combat performance using relaxed static stability and a spin prevention system (FBW Jaguar)
p 523 N87-22674

The assessment and evaluation of combat performance improvements
p 509 N87-22677

Acoustic testing of simplified cabin box, phase 1
[RP-698] p 549 N87-23241

An experimental investigation into methods for quantifying hang glider airworthiness parameters
[CAR-8705] p 585 N87-23611

Visual display research tool p 599 N87-23635
 Advanced visuals in mission simulators p 599 N87-23636
 Simulator motion characteristics and perceptual fidelity p 600 N87-23639
 Simulation of aircraft behaviour on and close to the ground: Summary of AGARD+IC6)ograph AG-285 p 600 N87-23640
 Development of in-flight simulation aircraft for research and training applications in UK p 602 N87-23658
 Numerical methods for unsteady transonic flow p 572 N87-24403
 The scaling of model test results to predict intake hot gas reingestion for STOVL aircraft with augmented vectored thrust engines p 593 N87-24418
 V/STOL and STOVL fighter design p 587 N87-24452
 Quiet aircraft study. Aerodynamic considerations of proposed swept shielded aircraft configurations [BAE-AERO/PROJ/087] p 587 N87-24456
 Transmission of inlet distortion through a fan p 594 N87-24475
 Aerodynamics of unmanned aircraft at full-scale in the RAE 24ft wind-tunnel [RAE-TM-AERO-2081] p 645 N87-26027
 Aerofoil maximum lift-coefficient for Mach numbers up to 0.4 [ESDU-84026] p 645 N87-26028
 An introduction to time-dependent aerodynamics of aircraft response, gusts and active controls [ESDU-84020] p 682 N87-26048
 Fatigue-life monitoring of the 5 metre wind tunnel [RAE-TM-AERO-2084] p 688 N87-26055
 First approximation to landing field length of civil transport aeroplanes (50 ft., 15.24 m screen) [ESDU-84040] p 688 N87-26056
 Helicopter vibration control: Recent advances p 660 N87-26247
 Estimation of spillage drag for a wide range of axisymmetric intakes at M 1 [ESDU-84004] p 701 N87-26301
 The treatment of calibrations of total air temperature probes for use in flight-test analysis work [ESDU-84007] p 701 N87-26324
 Introduction to installation effects on thrust and drag for propeller-driven aircraft [ESDU-85015] p 751 N87-26896
 Thrust and drag accounting for propeller/airframe interaction [ESDU-85017] p 751 N87-26897
 A method for the manufacture of model helicopter rotor blades with torsional stiffness representative of full scale [RAE-TR-85094] p 752 N87-26904
 Advanced turbine blading: A challenge for designer, materials developer and manufacturer [PNR90365] p 763 N87-26911
 Rolls Royce civil engines, the next generation [PNR90370] p 763 N87-26912
 Application of SPATE to high frequency vibration measurement of aero engine components [PNR90373] p 764 N87-27667
 The application of radiation physics and photogrammetric techniques for the diagnosis and solution of mechanical engineering problems and performance improvements in the development of aero gas turbine engines at Rolls-Royce [PNR90388] p 764 N87-27669
 Advanced technology and its application to aero engines [PNR90389] p 764 N87-27670
 The Rolls-Royce wide chord fan blade [PNR90392] p 764 N87-27671
 High angle of attack position sensing for the Southampton University magnetic suspension and balance system [NASA-CR-178358] p 780 N87-27681
 A flight evaluation of voice interaction as a component of an integrated helicopter avionics system [RAE-TM-FS(B)-637] p 829 N87-28547
 The flight development of a color electronic display format and monitoring system of helicopter engine and transmission data [RAE-TM-FS(B)-638] p 829 N87-28548
 The effect of load dwells on the fatigue of carbon fiber composites [BAE-MSM-R-GEN-0547] p 844 N87-28606
 A designers' guide to the achievement of electrical continuity in carbon fibre composite structures [CD6500551] p 844 N87-28607
 Noise attenuation properties of headsets in a helicopter noise environment [CAA-PAPER-87004] p 860 N87-29311

Contribution of wing dihedral to sideforce, yawing moment and rolling moment derivatives due to rate of roll at subsonic speeds, (Y sub p)sub gamma, (N sub p)sub gamma and (L sub p)sub gamma [ESDU-85006] p 813 N87-29409
 Pilot and static errors due to non-steady flight [ESDU-85011] p 813 N87-29410
 Estimation of sideforce, yawing moment and rolling moment derivatives due to rate of roll for complete aircraft at subsonic speeds [ESDU-85010] p 826 N87-29490
 Voice control of cockpit systems p 837 N87-29526
 The flight evaluation of a speech recognition and a speech output system in an advanced cockpit display and flight management system for helicopters p 829 N87-29527
 Diffusion bonding of metals p 852 N87-29646

Y

YUGOSLAVIA

Wake dynamics for incompressible and compressible flows p 278 A87-23643
 A decentralized approach to integrated flight control synthesis p 372 A87-29249
 Evaluation of transport alternatives p 399 A87-31145

CONTRACT NUMBER INDEX

AERONAUTICAL ENGINEERING / A Continuing Bibliography
1987 Cumulative Index

January 1988

Typical Contract Number Index Listing

Listings in this index are arranged alpha-numerically by contract number. Under each contract number, the accession numbers denoting documents that have been produced as a result of research done under that contract are arranged in ascending order with the AIAA accession numbers appearing first. The accession number denotes the number by which the citation is identified in the abstract section. Preceding the accession number is the page number on which the citation may be found.

REPORT NUMBER INDEX

AERONAUTICAL ENGINEERING / A Continuing Bibliography
1987 Cumulative Index

January 1988

Typical Report Number Index Listing

Listings in this index are arranged alpha-numerically by report number. The page number indicates the page on which the citation is located. The accession number denotes the number by which the citation is identified. An asterisk (*) indicates that the item is a NASA report. A pound sign (#) indicates that the item is available on microfiche.

ACCESSION NUMBER INDEX

AERONAUTICAL ENGINEERING / A Continuing Bibliography
1987 Cumulative Index

January 1988

Typical Accession Number Index Listing

Listings in this index are arranged alphabetically by accession number. The page number listed to the right indicates the page on which the citation is located. An asterisk (*) indicates that the item is a NASA report. A pound sign (#) indicates that the item is available on microfiche.

SPECIAL NOTICE

The abstract sections of the monthly supplements of *Aeronautical Engineering* can be bound separately. Individual abstracts can be located readily by means of the page numbers given at each entry, e.g., p 131 N87-12881. To assist the user in binding Supplements SP-7037(210) through SP-7037(221), a title page is included in this Cumulative Index.

AERONAUTICAL ENGINEERING

A CONTINUING BIBLIOGRAPHY

Abstracts
January — December 1987

TABLE OF CONTENTS

<i>SP-7037 Supplement</i>	<i>Page</i>
210	1
211	63
212	141
213	211
214	275
215	339
216	401
217	481
218	551

221	801

1. Report No. NASA SP-7037 (222)		2. Government Accession No.		3. Recipient's Catalog No.	
4. Title and Subtitle AERONAUTICAL ENGINEERING A Cumulative Index to the 1987 Issues				5. Report Date January 1988	
				6. Performing Organization Code	
7. Author(s)				8. Performing Organization Report No.	
				10. Work Unit No.	
9. Performing Organization Name and Address National Aeronautics and Space Administration Washington, DC 20546				11. Contract or Grant No.	
				13. Type of Report and Period Covered	
12. Sponsoring Agency Name and Address				14. Sponsoring Agency Code	
15. Supplementary Notes					
16. Abstract This bibliography is a cumulative index to the abstracts contained in NASA SP-7037 (210) through NASA SP-7037 (221) of Aeronautical Engineering: A Continuing Bibliography. NASA SP-7037 and its supplements have been compiled through the cooperative efforts of the American Institute of Aeronautics and Astronautics (AIAA) and the National Aeronautics and Space Administration (NASA). This cumulative index includes subject, personal author, corporate source, foreign technology, contract number, report number, and accession number indexes.					
17. Key Words (Suggested by Authors(s)) Aerodynamics Aeronautical Engineering Aeronautics Bibliographies				18. Distribution Statement Unclassified - Unlimited	
19. Security Classif. (of this report) Unclassified		20. Security Classif. (of this page) Unclassified		21. No. of Pages 504	
				22. Price * \$14.50 HC	

* For sale by the National Technical Information Service, Springfield, Virginia 22161
